

IEEE TRANSACTIONS ON INDUSTRIAL INFORMATICS

A PUBLICATION OF THE IEEE INDUSTRIAL ELECTRONICS SOCIETY

FEBRUARY 2008

VOLUME 4

NUMBER 1

ITIICH

(ISSN 1551-3203)

SPECIAL ISSUE ON COMMUNICATION IN AUTOMATION—PART I

EDITORIAL

Introducing Associate Editor Adriano Valenzano	1
Guest Editorial: Special Issue on Communication in Automation—Part I	2

SPECIAL ISSUE PAPERS

Fine-Tuning MAC-Level Protocols for Optimized Real-Time QoS	6
A Distributed Instrument for Performance Analysis of Real-Time Ethernet Networks	16
On the Analysis of CSMA-Based Control Nets With Priorities and Multicast	26

REGULAR ISSUE PAPERS

Automatically Configuring Time-Triggered Schedulers for Use With Resource-Constrained, Single-Processor Embedded Systems	37
Damping of Torsional Vibrations in Two-Mass System Using Adaptive Sliding Neuro-Fuzzy Approach	47
A Multiple Criteria Decision-Making Knowledge-Based Scheme for Real-Time Power Voltage Control	58

ANNOUNCEMENTS

Call for Papers—13th International Conference on Emerging Technologies and Factory Automation (ETFA 2008)	67
Call for Papers—14th International Conference on Emerging Technologies and Factory Automation (ETFA 2009)	68
